Education

James Cook University Singapore | Bachelor of IT | GPA 5.85/7 **Jan 2025 - Mar 2027 expected**

Coursework: Advanced Software Engineering, Mobile Computing and Database Modelling.

EMAS Peer Tutor, May - Aug 2026: supported over 50 students in programming and IT courses.

BCA Academy Singapore | Diploma in Construction Engineering **Oct 2021 - Nov 2024**

Experience

Basilos Pte. Ltd. Singapore | AI Engineer Intern **Jul - Oct 2026**

- Joined a Golden Travel client visit; assessed passport / GeBIZ tender information extraction, deadline reminders and itinerary planning. Prioritised the first two, documented sensitive-data restrictions and proposed implementation steps.
- Evaluated nine Feishu CLI modules, including Markdown import, multidimensional tables, calendars and tasks. Investigated scope permissions and User/Bot identities; wrote a reusable guide with steps and limitations.
- Compiled 54 internal face-connector test records and timing results; identified unverified scenarios and improvement items to support internal acceptance.

STAS Singapore | Operations and Administration Intern **Apr - Sep 2024**

- Checked prefab MEP manufacturer applications against assessment criteria; organised open and closed cases and compiled review notes.
- Maintained two-stage payment records for three exhibitions, screened exhibitors, and independently researched construction-material exhibitions in China.

Selected Projects

Smart Digital Product Recommendation Platform **May - Aug 2026**

Product Owner | Team of 4 | Scrum, GitHub Issues, GitHub Actions | Demo | Code

- Translated requirements into 10 user stories with acceptance criteria and coordinated three Scrum iterations as PO; the team delivered recommendations across five product categories.
- Managed scope freeze and changes, linking requirements, implementation and tests. Addressed estimate variance by coordinating scope adjustments and frontend, data and API dependencies.
- Coordinated PR reviews and release checklists, confirming 12 team CI acceptance tests passed before release freeze; also contributed frontend debugging, API integration and deployment support.

SmartSeat Classroom Seat Management Course Project **Sep - Dec 2025**

Frontend / Interaction Lead; Rotating Scrum Master | Team of 7 | 6 Sprints | Demo | Code

- Owned frontend work and paired with the backend; independently designed a 16-screen high-fidelity prototype and interaction specifications. Joined three usability-test rounds (60 participant sessions) and tracked feedback in GitHub Issues.
- Traced seat-selection errors to inconsistent coordinate origins; paired with the backend to align coordinate mapping and restore correct selection. Coordinated tasks and blockers while serving as Scrum Master.

Skills

Scrum, user stories and acceptance criteria, requirements traceability, GitHub Issues / Actions, Figma / FigJam, Excel.
