REFERENCE LETTER

To whom it may concern,

With James Cook University, I am lecturing various Information Technology courses. I am writing to recommend Junjie Chu for postgraduate study at your esteemed university. I have taught Junjie in my *Introductory Machine Learning and Data Science* and *Advanced Software Engineering* courses.

Throughout my interactions with Junjie, he has demonstrated strong technical and analytical ability. In machine learning and data science, he showed the ability to interpret results carefully, compare different approaches, and clearly justify his technical decisions. In Advanced Software Engineering, Junjie took an active role in team-based software development and showed a good understanding of agile development, requirements planning, software engineering practices, and collaborative project delivery. He worked responsibly with others and showed clear leadership in coordinating technical work and maintaining project quality.

Junjie is a motivated and responsible student who combines independent learning, analytical thinking, practical problem-solving, teamwork, and leadership potential. Having taught him across two different areas of Information Technology, I have seen his ability to adapt to technical challenges and continue developing his skills.

I am therefore pleased to recommend Junjie Chu for admission to your postgraduate programme. I believe he has the academic foundation, technical capability, practical experience, and motivation required for further study. Please feel free to contact me if you require any additional information.

Yours Sincerely,

Dr. Dasheng Liu
